PROFESSIONAL SUMMARY

I'm a passionate full-stack developer with hands-on experience in building real-world MERN stack applications. I specialize in creating intuitive UIs and scalable backend systems. I thrive in team environments, stay current with emerging tech, and focus on delivering user-centric, high-quality solutions that align with industry standards and real-world needs.

SKILLS

Technologies: Frontend frameworks (ReactJS) Backend frameworks (NestJS, NodeJS) Container orchestration (Docker) Authentication protocols (JWT, OAuth) Data caching (Redis) Cloud services (AWS EC2, S3, Recognition) NoSQL databases (MongoDB)

WORK EXPERIENCE

Full Stack Developer Intern

WebSenor | Udaipur, Rajasthan

Aug 2024 - Oct 2024

- Collaborated with cross-functional teams to develop responsive web Clone of Zepto applications using modern front-end frameworks like React and back-end technologies including Node.js with Node framework like NestJS.
- Implemented RESTful APIs to streamline data exchange between the client-side and server-side, improving application performance by 20%.
- Participated in code reviews and agile development processes, contributing to a 30% decrease in debugging time.

MERN Stack Developer

WebSenor | Udaipur, Rajasthan

Nov 2024 - Feb 2025

- Built a scalable Psychological Attribute Analysis app using the MERN stack for organizational performance tracking.
- Integrated AI to extract insights and generate interactive visualizations for HR and leadership.
- Implemented hierarchical role-based access control with customizable permissions per role.
- Containerized backend using Docker for optimized, scalable deployments.
- Optimized backend performance using efficient MongoDB queries and NestJS enhancements.
- Utilized smarter prompt engineering techniques to achieve more accurate AI responses while minimizing token usage eg: Maintain 1700 to 2000 Token size to get a valid JSON Structure for the data of 3000 words.

React Developer

MyPay Communication | Udaipur, Rajasthan

Feb 2025 - Present

- Spearheaded the development of MyPay's fintech e-wallet frontend from the ground up using React.js with scalable architecture.
 - Engineered in-app KYC verification, integrating Azure Speech API for speech recognition and MediaPipe for facial distance validation during video recording.
 - Enabled dynamic document uploads tailored to multiple user roles and KYC types, ensuring compliance across user personas.
 - Built a responsive Progressive Web App (PWA) optimized for cross-device compatibility and performance.
 - Implemented data ingestion pipelines from Excel sheets, parsing into tabular formats using ShadCN UI components.
 - Applied industry best practices in state management, component modularization, and code reusability for long-term maintainability.
-

EDUCATION

Bachelor of Computer Applications (BCA)

Mohanlal Sukhadia University | Udaipur, Rajasthan

Oct 2021 - Oct 2024

CGPA: 7.06

12th Commerce

Guru Nanak Public School | Udaipur, Rajasthan

Mar 2020 - Mar 2021

Percentage: 85%
